Roaring Twenties Series

Ultra Low-Maintenance Insulated Carriage House Doors

The Ultimate in Vinyl Composite Technology

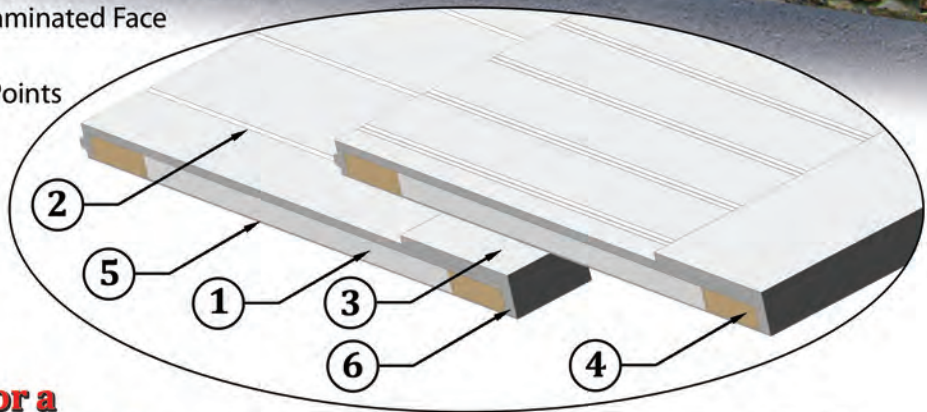

Classic designs reminiscent of a special time in American History - Available in Flush or Simulated Batten styles in V-Groove or Beadboard.

Since 1924 the Fimbel Family has been manufacturing Custom Doors. Every door we produce is done so by using quality materials and drawing on over 90 Years of experience in craftsmanship and engineering excellence. Our **Roaring Twenties Series** is renowned as the Top-of-the-Line Insulated Composite Carriage House Door.

...Timeless

The **Roaring Twenties Series** is a highly insulated, 1 3/4" thick Carriage House Door, built using our durable Vinyl Composite Technology. The door face is precision machined with either a Batten "V" Groove or Architectural Beadboard Design, and overlays are laid into a pocketed face to prevent water from penetrating into the surface. The entire face is laminated to an insulated core. **Roaring Twenties Series** doors look great and outperform wood and steel doors on all levels.

The highly weatherable PVC exterior can be left natural white or Factory Finished. Our high performance, heat reflective finishing system has its own 15 year warranty. Please consult the factory for area-specific color palette availability.

* 16' wide Door shown with optional Simulated Raised Center Post

...Elegant

The **Roaring Twenties Series** is readily available in sizes that include 8', 9', 10', 15', 16', and 18' wide by 6'6", 7'0", 7'6" and 8'0" high, in the standard designs shown below. They can quickly be furnished with our 6, 8, 12, and 16 lite stock grille designs or solid tops.

Roaring Twenties doors are also available in custom designs and sizes, and with Tru-Divide frame Grille tops. Our engineering department can create the special look you've been searching for for your home.
